Match Feature: June 26th G13 OPDL
Bryce Kuepfer | July 2, 2019 | RIM Park AF2

Last Wednesday night, Waterloo United's U13 OPDL Girls team hosted London TFC's U13 OPDL Girls team. RIM Park was the venue for the match and was a very warm summer night. The match was a low scoring defensive battle. The Waterloo United girls played hard, doing their best to meet their performance objectives set by their coaches. Waterloo United Technical Coordinator and U13 OPDL Girls Head coach, Anthony Locane, was very proud of the girls effort out on the pitch. Anthony was very happy to share that they had met or exceeded all of their performance objectives in his post match team talk. It was very impressive to see these girls working on specific aspects of their individual, unit, and team game through these objectives!

Player Profile: Isabella Sofia Amico

Isabella (Izzy) Sofia Amico wears #5 for Waterloo United U13 ODPL Girls. Izzy captains her team as a very composed defensive player. Izzy comes from the small town of Mount Forest. When asked about her role as captain, Izzy expressed how proud she is to wear the armband for her team. She knows that her leadership is important and loves to see when others on her team speak up or show leadership out on the pitch. While giggling with teammates she shared that her favourite memory from her young soccer career so far was their recent overnight away game trip to Kingston. Amongst all the fun with her team, Izzy mentioned how great of a team building experience it was.

Izzy is a big Manchester City fan with Kevin De Bruyne being her favourite player. "He is a great playmaker, I love how well he sees the game." Izzy is also paying close attention to the Women's World Cup despite the heartbreaking exit of our Canadian Women's National

Team and Izzy's second choice side, Italy. This young captain leads well beyond her years, her maturity on and off the pitch is extremely evident! All of us at Waterloo United wish Izzy and the rest of the U13 OPDL Girls team a great rest of the season!
