Video and Data Analyst Internship

Waterloo Minor Soccer is providing internship opportunities in the area of data analysis. The data analyst will work with our Skill Centre, OPDL and League One teams to gather data on individual and team performance and assist with the development of norms in areas related to development of players and coaches in training and competition.

The suitable candidates will be flexible, enthusiastic and innovative and be proactive in finding solutions that can fit both the needs of the student's learning plan and the needs of the club.

Skills:

- Must be a proactive communicator and be willing to ask questions
- Flexible to find solutions to problems and find new ways to do things at the club
- Knowledge of JSON and Soccer an advantage
- Experience using Tableau or Microsoft Power BI an advantage

Availability:

- Must be able to work within the constraints of the soccer club environment and potentially be available in evenings or week-ends according in accordance with an agreement made with the club that will accommodate the student's personal situation.

Work Outline:

- Students taking part in the internship will collect data using a combination of video coding using in-house software, online vendors and other technology for acquiring data across physical, technical and tactical data.
- Uploading data onto online platforms for further analysis
- Creation of dashboards for coaches and Technical Staff to use with players, coaches and parents to enhance learning
- Review current trends in data analytics relevant to sport and make recommendations to the club to improve best practices

Please reply with a one-page cover letter stating your claims against the criteria listed to Technical Director Matt Shepherd at matthew@waterloounited.com by Sunday, June 7th*.

*(*Interested students are encouraged to contact the club ahead of applying, should they have questions*)*
